TEQNOVATION

Integrating technology with innovative minds

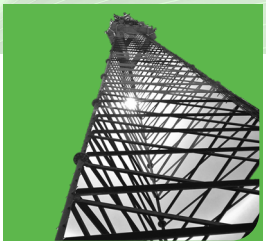

SERVICES PORTFOLIO

INNOVATIVE SOLUTIONS FOR DIGITAL OIL FIELD

PROCESS DATA MEASUREMENT

Proprietary design, industrial grade wireless meters through LPWAN protocols, battery operated with up to ten years of autonomy.

NETWORKING AND DATA MANAGEMENT

Private Network design and custom LoRaBox server and hardware supply. Integrated with the client current data network (wired or wireless).

LIVE AUTOMATED DIAGNOSIS

Perform live trends, alarms, diagnosis or optimization over the network; maximizing performance and profitability while reducing risk.

VISUALIZATION

Customizable dashboards to access trends information anywhere within a simplified interface.

LIVE INTEGRATED MODELLING

Models connection to real time data providing engineers full network status, alarms and optimization opportunities.

Who We Are

We are focused into transform costly and time demanding monitoring, control, analysis and forecasting processes problems into reliable, simple, energy efficient, low cost, automatic solutions.

Our wireless process instrument solution allows customers savings of hundreds of thousands $$$ in instrumentation, cabling and installation
